

July 4, 2007

Dear Diamond Aircraft Association,

We are very pleased to hear that an active group of owners has gotten together to form a non-profit, cooperative association for Diamond owners and pilots. We believe that a well-run, participatory owners group can be of high value to our customers' experience. We are convinced that you can make a big difference by educating Diamond owners, creating a feeling of community, and serving as a liaison between us, the manufacturer, and our customers, who are your members.

We want to assure you that we are looking forward to working with you in different ways, as the opportunity arises - from providing technical contacts and information, to co-sponsoring events and joining efforts aimed at sharing the information that will enhance the operation of Diamond airplanes, maximize the ownership experience, and maintain Diamond's industry leading safety record.

Don't hesitate to contact us if we can be of help.

Sincerely,

A handwritten signature in cursive script, appearing to read "Heike Larson".
